Web Hosting Dedicated

Our dedicated hosting service is for the organization who needs advanced performance, bandwidth, and disk space.

Features:

- **Hardware-** newly purchased Dell servers are built and configured to deliver power, flexibility, and performance. Every dedicated server includes support for system administration and a set of software applications to both administer your server and help your clients.
- **Data Center-** state of the art private racks housed at Time Warner Telecom/AOL data center in Minnetonka, Minnesota. The facilities offer complete redundancy in power, HVAC, fire suppression, network connectivity, and more.
- **Control Panels-** our dedicated servers come with any of these popular control panels: DirectAdmin, WHM/CPanel and Webmin

We also offer domain name registration and SSL certificate management.
